Kareem Hatem Abdelsabour

Cairo, Egypt 11765 || +201020888252 || Kareemhatem2001.kh@gmail.com

Professional Summary

Software Engineer at Clixsys and MSc Information Systems student, building production business systems for real clients, including a full-scale ERP for a manufacturing company and a residents app with QR-based gate access for a residential compound developer. Hands-on experience in full-stack development (React, Firebase, PHP, JavaScript, SQL), database design (Oracle PL/SQL), and systems analysis, plus IT work during military service. Also a Teaching Assistant, teaching programming and web development to about 150 students per semester, bringing the discipline and teamwork of a former professional athlete and Guinness World Record holder.

Skills

Programming: Java, Python, PHP, TypeScript, SQL, PL/SQL

Web & Mobile: HTML, CSS, JavaScript, React, Node.js, Flutter/Dart, Android Studio

Databases: Cloud Firestore, Oracle SQL, MySQL (phpMyAdmin), MS Access, Database Administration

Systems & Tools: Firebase, Git & GitHub, Odoo ERP, Visual Paradigm (UML/DFD), MS Project, Figma, Streamlit

Core: ERP Development, Requirements Analysis, System Analysis and Design, Role-Based Access Control, Object-Oriented Programming, Data Analysis, Debugging

Professional Experience

Software Engineer **09/2026 – Present**

Clixsys – Smart Home Automation & IoT Integration, Cairo

- Develop custom software for Clixsys clients, from requirements and system design to delivery.
- **Decorama ERP:** Building a complete ERP system for a blinds manufacturer and retailer, along with a website and mobile app for its users; delivered the Inventory and Field Service modules and currently developing Sales/CRM, Manufacturing, and HR modules.
- **PRE Group Residents App:** Developing a residential compound app that lets residents issue guest invitations with secure, gate-scannable QR codes, and extending it with a guest arrival web experience.

Teaching Assistant **08/2025 – Present**

Arab Academy for Science, Technology, and Maritime Transport (AASTMT) – Cairo

- Teach *Introduction to Programming*, *Web Programming* (PHP, HTML, CSS, JavaScript), and *Web Design Fundamentals* (Figma) to about 6 groups per semester (roughly 25 students each, about 150 students in total).
- Deliver hands-on lab sessions where students build and debug their own code, from programming basics to server-side PHP applications and UI/UX prototypes in Figma.
- Design adaptive lesson plans and provide individualized support, including for students with special needs, to accommodate different learning styles and increase engagement.

Intern, Internal Commerce Department **06/2023 – 07/2023**

Egyptian Natural Gas Holding Company (EGAS) – Cairo

- Supported the internal commerce team with daily administrative and analytical tasks.
- Organized, updated, and maintained commercial files, spreadsheets, and reports.
- Assisted in preparing data and documents related to commercial operations and contracts.

Military Service

Military Service, Completed **10/2024 – 12/2025**

IT Department

- Registered military identification cards on the system, ensuring accurate and secure data entry.
- Reviewed, approved, and printed online military service certificate orders.

Education

Master of Science in Information Systems **Expected 06/2028**

Arab Academy for Science, Technology, and Maritime Transport (AASTMT), Cairo

Post-Baccalaureate Diploma in Computer and Information Systems **02/2026**

Arab Academy for Science, Technology, and Maritime Transport (AASTMT), Cairo

Bachelor of Science in Business Information Systems **06/2024**

Arab Academy for Science, Technology, and Maritime Transport (AASTMT), Cairo

Professional Projects

Decorama ERP – Enterprise Resource Planning System (Clixsys)
Designing and building an end-to-end ERP system for Decorama, a company that manufactures and sells blinds, together with a website and mobile app for its users, all connected to one integrated platform.

- **Inventory Management:** Delivered a module to track materials and finished products across the business.
- **Field Service Management:** Delivered a module to plan, assign, and track on-site service jobs.
- **User Website & Mobile App:** A website and a mobile app that give Decorama's users direct access to the system.
- **Ongoing Expansion:** Developing Sales/CRM, Manufacturing, and HR modules to cover the full business cycle.
- **Tech Stack:** React, Firebase (Firestore, Auth, Cloud Functions), Node.js; TypeScript for the website.

PRE Group Residents App – Compound Guest Access Platform (Clixsys)
Developing a residents app for PRE Group's residential compounds that digitizes visitor access and improves gate security.

- **Guest Invitations:** Residents send invitations with a personalized message and a unique QR code that guests scan at the compound gate.
- **Guest Arrival Website (in progress):** Linked web page showing the compound's location on Google Maps, the gate QR code, and an interactive 3D compound map that guides guests to the resident's unit.

Graduation Project

Athleonix – Athletic Excellence & Scholarship Platform
Designed and implemented a digital ecosystem that empowers athletes to reach their professional and academic potential, facilitating partnerships between sponsoring organizations and universities in the USA, Germany, and Canada to streamline athletic scholarship acquisition.

- **Integrated Athlete Support:** Developed a healthcare module with tailored resources for Nutrition, Physiotherapy, and Psychology.
- **Full-Stack Development:** Built a web app with interfaces for universities, sponsors, and healthcare specialists.
- **Frontend & Backend:** Used **HTML, CSS, and JavaScript** for the frontend, with **PHP** managing server-side operations and database connectivity.
- **Database Management:** Designed a relational schema in **SQL (phpMyAdmin)** to manage users and organizations.

Academic Projects

Semantic Search Engine (Python, Streamlit)
Built a search engine using Information Retrieval principles, with semantic search to improve result relevancy and an interactive web interface.

Sports Complex Management System (Oracle SQL & PL/SQL)
Designed a relational database on Oracle Live SQL with a detailed ERD; implemented business logic in PL/SQL using joins, sub-queries, and triggers to manage high-volume data for a multi-functional sports facility.

ERP System Implementation (Odoo)
Configured and deployed an Odoo ERP solution, customizing CRM, After-Sales/Retail, and Event Management modules to streamline processes and centralize reporting.

Swimming Equipment E-commerce Interface (Flutter/Dart)
Developed a cross-platform mobile interface for selling swimming equipment, focused on performance and visual consistency.

Additional Projects

- **UI/UX Design (Figma):** High-fidelity mobile prototype for the graduation project and a scalable website design system using components and variants.
- **System Analysis & Design (Visual Paradigm):** Full-lifecycle analysis with Context, DFD, Use Case, Class, Activity, and Sequence diagrams.
- **Software Project Management Plan (MS Project):** WBS, timelines, resource allocation, and critical path analysis.

Achievements

Ex-Professional Swimmer

- Guinness World Record Holder
- 4x African Champion
- 3x Arab Champion
